WORK EXPERIENCE - FULL TIME ROLES

Consultadd Inc.

Software Engineer - | May 2023 - Present

I worked on a healthcare website that harnesses AI to assist medical professionals in extracting valuable insights from medical reports. My primary responsibilities centered around frontend development using Angular, Material Angular, and Azure Functions using Python to create a streamlined and effective platform.

Software Engineer Intern   September 2022 - April 2023

During my internship, I successfully contributed to the creation of a healthcare website dedicated to serving the unique needs of the LGBTQ community. My role primarily focused on frontend development, where I leveraged advanced technologies like React, Redux, GraphQL, and styled-components to deliver a sophisticated and user-friendly digital solution.

WORK EXPERIENCE - FREELANCE

Code Matrix

UI Designer   January 2022 - July 2022

Designed a comprehensive online education platform with high-fidelity prototypes, aimed at enhancing students' preparation for placement and job opportunities. This innovative website offers a user-friendly interface to empower students in achieving their career goals.

Indo Shark Lines

UI Designer   June 2022

Crafted a user-friendly UI for a sea and port-oriented service website, featuring intuitive login and signup pages, as well as a captivating homepage. This design streamlines data accessibility and simplifies service category selection for an enhanced user experience.

Ramathematics

Frontend Developer & UI Designer   December 2021 - January 2022

Designed & developed a website for my math professor, facilitating easy access to mathematics notes and video tutorials for students. This platform enhances the learning experience and supports academic success in mathematics.

CERTIFICATIONS

AWS Certified Solutions Architect - Associate

Issued July 2023

Gained knowledge in a variety of AWS services, including computing, networking, storage, and databases, and how to use them effectively. Skilled in deploying, managing, and securing applications on AWS, and get familiar with AWS tools and best practices for designing and operating robust cloud solutions.

Google UX Design Specialization

Issued November 2022

Strengthened user-centered design skills through empathy, addressing pain points, and crafting innovative solutions. Acquired expertise in UX research, foundational concepts, and built a diverse portfolio emphasizing accessibility and user equity in mobile apps, responsive websites, and cross-platform experiences.
